Basic SELECT Statement

```
SELECT * | { [DISTINCT] column|expression [alias],... }  
FROM   table;
```

SELECT identifies what columns
FROM identifies which table

(A+B)

ORACLE

Copyright © Oracle Corporation. 2001. All rights reserved.

Selecting All Columns

```
SELECT  *
FROM    departments;
```

DEPARTMENT_ID	DEPARTMENT_NAME	MANAGER_ID	LOCATION_ID
10	Administration	200	1700
20	Marketing	201	1800
50	Shipping	124	1500
60	IT	103	1400
80	Sales	149	2500
90	Executive	100	1700
110	Accounting	205	1700
130	Contracting		1700

8 rows selected.

```
SELECT department_id, location_id  
FROM departments;
```

DEPARTMENT_ID	LOCATION_ID
10	1700
20	1800
50	1500
60	1400
80	2500
90	1700
110	1700
190	1700

8 rows selected

Writing SQL Statements

SQL statements are not case sensitive.

SQL statements can be on one or more lines.

Keywords cannot be abbreviated or split across lines.

Clauses are usually placed on separate lines.

Indents are used to enhance readability.

$$(A+B)' = A'B'$$

ORACLE

Copyright © Oracle Corporation, 2001. All rights reserved

Arithmetic Expressions

Create expressions with number and date data by using arithmetic operators.

Operator	Description
+	Add
-	Subtract
*	Multiply
/	Divide

$$(A+B)^2 = A^2 + 2AB + B^2$$

Using Arithmetic Operators

```
SELECT last_name, salary, salary + 300  
FROM employees;
```

LAST_NAME	SALARY	SALARY+300
King	24000	24300
Kochhar	17000	17300
De Haan	17000	17300
Munold	9000	9300
Ernst	6000	6300
...		
Hartstein	13000	13300
Fay	6000	6300
Higgins	12000	12300
Gietz	8300	8600
20 rows selected		

$$(A+B)' = \dots$$

Operator Precedence

* / + -

Multiplication and division take priority over addition and subtraction.

Operators of the same priority are evaluated from left to right.

Parentheses are used to force prioritized evaluation and to clarify statements.

$(A+B)^2 = \dots$

Operator Precedence

```
SELECT last_name, salary, 12*salary+100  
FROM employees;
```

LAST_NAME	SALARY	12*SALARY+100
King	24000	288100
Kochhar	17000	204100
De Haan	17000	204100
Hunold	9000	108100
Ernst	6000	72100

Hartstein	13000	156100
Fay	6000	72100
Higgins	12000	144100
Geitz	8000	99700

20 rows selected

Defining a Null Value

A null is a value that is unavailable, unassigned, unknown, or inapplicable.

A null is not the same as zero or a blank space.

```
SELECT last_name, job_id, salary, commission_pct  
FROM employees;
```

LAST_NAME	JOB_ID	SALARY	COMMISSION_PCT
King	AD_PRES	50000	
Hochmar	AD_VP	12000	
...			
Dolker	SA_MAN	6000	
Abel	SA_REP	4000	
Taylor	SA_REP	3000	
...			
Gretz	AD_ACCOUNT	8000	
20 rows selected			

Null Values in Arithmetic Expressions

Arithmetic expressions containing a null value evaluate to null.

```
SELECT last_name, 12*salary*commission_pct  
FROM employees;
```

LAST_NAME	12*SALARY*COMMISSION_PCT
King	
Kochhar	
...	
Zlotkey	25200
Abel	39600
Taylor	20640
...	
Gietz	
20 rows selected	

Defining a Column Alias

A column alias:

Renames a column heading

Is useful with calculations

Immediately follows the column name - there can also be the optional AS keyword between the column name and alias

Requires double quotation marks if it contains spaces or special characters or is case sensitive

$$(A+B)^2 = A^2 + 2AB + B^2$$

Using Column Aliases

```
SELECT last_name AS name, commission_pct comm  
FROM employees;
```

NAME	COMM
King	
Kochhar	
De Haan	
...	
20 rows selected.	

```
SELECT last_name "Name", salary*12 "Annual Salary"  
FROM employees;
```

Name	Annual Salary
King	285000
Kochhar	204000
De Haan	204000
...	
20 rows selected.	

(A+B)

Concatenation Operator

A concatenation operator:

Concatenates columns or character strings to other columns

Is represented by two vertical bars (||)

Creates a resultant column that is a character expression

(A11) - 11

Using the Concatenation Operator

```
SELECT      last_name || job_id AS "Employees"  
FROM        employees;
```

Employees

KingAD_PRES
KochharAD_VP
De HaanAD_VP
HunoldIT_PROG
ErnstIT_PROG
LorentzIT_PROG
MourgosST_MAN
RajsST_CLERK
...

20 rows selected.

Using Literal Character Strings

```
SELECT last_name || ' is a ' || job_id  
      AS "Employee Details"  
FROM   employees;
```

Employee Details
King is a AD_PRES
Kochhar is a AD_VP
De Haan is a AD_VP
Hunold is a IT_PROG
Ernst is a IT_PROG
Lorentz is a IT_PROG
Mourgos is a ST_MAN
Rajs is a ST_CLERK
...

20 rows selected

Duplicate Rows

The default display of queries is all rows, including duplicate rows.

```
SELECT department_id  
FROM employees;
```

DEPARTMENT_ID	NAME	LOCATION_ID	MANAGER_ID	HIRE_DATE	SALARY	COMMISSION_PCT	DEPARTMENT_NAME	ADDRESS	CITY	STATE_PROVINCE	POSTAL_CODE	PHONE_NUMBER

...

20 rows selected

ORACLE

Eliminating Duplicate Rows

Eliminate duplicate rows by using the DISTINCT keyword in the SELECT clause.

```
SELECT DISTINCT department_id  
FROM employees;
```

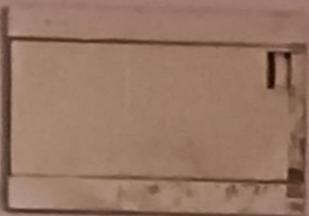

DEPARTMENT_ID	(,)
10	(,)
20	(,)
30	(,)
40	(,)
50	(,)
60	(,)
70	(,)
80	(,)
90	(,)
100	(,)
110	(,)

8 rows selected.

Displaying Table Structure

DESCRIBE employees

90

102

De Haan

AD_VP

90

Limiting the Rows Selected

Restrict the rows returned by using the WHERE clause.

```
SELECT      * | { [DISTINCT] column | expression [alias], ... }  
FROM        table  
[WHERE      condition(s)];
```

The WHERE clause follows the FROM clause.

Using the WHERE Clause

```
SELECT employee_id, last_name, job_id, department_id  
FROM employees  
WHERE department_id = 90;
```

EMPLOYEE_ID	LAST_NAME	JOB_ID	DEPARTMENT_ID
100	King	AD_PRES	90
101	Kochhar	AD_VP	90
102	De Haan	AD_VP	90

Character Strings and Dates

Character strings and date values are enclosed in single quotation marks.

Character values are case sensitive, and date values are format sensitive.

The default date format is DD-MON-RR.

```
SELECT last_name, job_id, department_id  
FROM employees  
WHERE last_name = 'Whalen';
```

$$(A+B)' = A' + B'$$

Comparison Conditions

Operator	Meaning
=	Equal to
>	Greater than
>=	Greater than or equal to
<	Less than
<=	Less than or equal to
◊	Not equal to

Using Comparison Conditions

```
SELECT last_name, salary  
FROM employees  
WHERE salary <= 3000;
```

LAST_NAME	SALARY
Matos	2500
Vargas	2500

Other Comparison Conditions

Operator	Meaning
BETWEEN ... AND ...	Between two values (inclusive),
IN (set)	Match any of a list of values
LIKE	Match a character pattern
IS NULL	Is a null value

Using the BETWEEN Condition

Use the BETWEEN condition to display rows based on a range of values.

```
SELECT last_name, salary  
FROM employees  
WHERE salary BETWEEN 2500 AND 3500;
```

LAST_NAME	Lower limit	Upper limit
Rajs		
Daves		3500
Matos		3100
Vargas	2600	2500

$$(A+B)' = r$$

Using the IN Condition

Use the IN membership condition to test for values in a list.

```
SELECT employee_id, last_name, salary, manager_id  
FROM employees  
WHERE manager_id IN (100, 101, 201);
```

EMPLOYEE_ID	LAST_NAME	SALARY	MANAGER_ID
202	Fay	6000	201
200	Whalen	4400	101
205	Higgins	12000	101
101	Kochhar	17000	100
102	De Haan	17000	100
124	Mourgos	5800	100
149	Dotkey	10500	100
201	Hartstein	13000	100

8 rows selected.

Using the LIKE Condition

Use the LIKE condition to perform wildcard searches of valid search string values.

Search conditions can contain either literal characters or numbers:

% denotes zero or many characters.

_ denotes one character.

```
SELECT    first_name  
  FROM      employees  
 WHERE     first_name LIKE 'S%';
```

ORACLE

Copyright © Oracle Corporation, 2001. All rights reserved.

Using the LIKE Condition

You can combine pattern-matching characters.

```
SELECT last_name  
FROM employees  
WHERE last_name LIKE '_o%';
```

LAST_NAME

Kochhar

Lorentz

Mourgos

You can use the ESCAPE identifier to search for the
actual % and _ symbols.

Using the NULL Conditions

Test for nulls with the IS NULL operator.

```
SELECT last_name, manager_id  
FROM employees  
WHERE manager_id IS NULL;
```

LAST_NAME	MANAGER_ID
King	

Logical Conditions

Operator	Meaning
AND	Returns TRUE if <i>both</i> component conditions are true
OR	Returns TRUE if <i>either</i> component condition is true
NOT	Returns TRUE if the following condition is false

Using the AND Operator

AND requires both conditions to be true.

```
SELECT employee_id, last_name, job_id, salary  
FROM employees  
WHERE salary >=10000  
AND job_id LIKE '%MAN%';
```

EMPLOYEE_ID	LAST_NAME	JOB_ID	SALARY
149	Zlotkey	SA_MAN	10500
201	Hartstein	MK_MAN	13000

Using the OR Operator

OR requires either condition to be true.

```
SELECT employee_id, last_name, job_id, salary  
FROM employees  
WHERE salary >= 10000  
OR job_id LIKE '%MAN%';
```

EMPLOYEE_ID	LAST_NAME	JOB_ID	SALARY
100	King	AD_PRES	24000
101	Kochhar	AD_VP	17000
102	De Haan	AD_VP	17000
124	Mourgos	ST_MAN	5800
149	Zlotkey	SA_MAN	10500
174	Abel	SA_REP	11000
201	Hartstein	MK_MAN	13000
205	Higgins	AC_MGR	12000

8 rows selected.

Using the NOT Operator

```
SELECT last_name, job_id  
FROM employees  
WHERE job_id  
NOT IN ('IT_PROG', 'ST_CLERK', 'SA REP');
```

LAST_NAME	JOB_ID
King	AD_PRES
Kochhar	AD_VP
De Haan	AD_VP
Mourgos	ST_MAN
Zlotkey	SA_MAN
Whalen	AD_ASST
Hartstein	MK_MAN
Fay	MK_REP
Higgins	AC_MGR
Gietz	AC_ACCOUNT

10 rows selected.

Rules of Precedence

Order Evaluated	Operator
1	Arithmetic operators
2	Concatenation operator
3	Comparison conditions
4	IS [NOT] NULL, LIKE, [NOT] IN
5	[NOT] BETWEEN
6	NOT logical condition
7	AND logical condition
8	OR logical condition

Override rules of precedence by using parentheses.

Rules of Precedence

```
SELECT last_name, job_id, salary  
FROM employees  
WHERE job_id = 'SA_REP'  
OR    job_id = 'AD_PRES'  
AND    salary > 15000;
```

LAST_NAME	JOB_ID	SALARY
King	AD_PRES	24000
Abel	SA_REP	11000
Taylor	SA_REP	8600
Grant	SA_REP	7000

Rules of Precedence

Use parentheses to force priority.

```
SELECT last_name, job_id, salary  
FROM   employees  
WHERE  (job_id = 'SA_REP'  
OR     job_id = 'AD_PRES')  
AND    salary > 15000;
```

LAST_NAME	JOB_ID	SALARY
King	AD_PRES	24000

ORDER BY Clause

Sort rows with the ORDER BY clause

ASC: ascending order, default

DESC: descending order

The ORDER BY clause comes last in the SELECT statement.

```
SELECT last_name, job_id, department_id, hire_date  
FROM employees  
ORDER BY hire_date;
```

LAST_NAME	JOB_ID	DEPARTMENT_ID	HIRE_DATE
King	AD_PRES	90	17-JUN-87
Whalen	AD_ASST	10	17-SEP-87
Kochhar	AD_VP	90	21-SEP-89
Hunold	IT_PROG	60	03-JAN-90
Ernst	IT_PROG	60	21-MAY-91
...			

20 rows selected.
